

## *Fritillaria gentneri*

Liliaceae

Gentner's fritillary

Tanya Harvey

Illustrated by Rena Schlachter

Perennial, erect herb. Bulb fleshy, surrounded by small bulbs. Stem stout, glaucous, green to purple, red below ground, 50-70 cm tall. Leaves broadly linear to lanceolate, 7-15 cm long, 3-5 to a whorl. Flowers 1-5, nodding; perianth 3.5-5 cm long, red to purple, mottled with pale yellow, little or not at all recurved. Fruit a capsule, broadly dentate winged, 2-2.5 cm long, 2.5-3.5 cm wide.
